

PRICING STRATEGY · CONFIDENTIAL

Piattaforma DVR Modello di pricing

Two go-to-market models for the N2O safety-documentation platform: one for consultancies that resell it across many client engagements, one for the employer who needs a single compliant file. Priced against market evidence, verified unit economics, and the obligations in D.Lgs. 81/2008.

MODEL A · CONSULENTI

€3.900/anno

Tier "Studio" — 5 seats, 60 active client companies, all 17 document types. 2–4 % of the revenue it produces.

MODEL B · AZIENDA DIRETTA

€990/anno

Tier "Plus" — 3 sites, 5 users, DVR + all core attachments, RSPP review included.

GROSS MARGIN

92–97 %

Variable COGS measured at €1,85 per complete engagement. Price is a value decision, not a cost decision.

The evidence the prices are built on

What is actually built, what it costs to run, what the market already pays, and what the law forces buyers to keep doing.

1 What is being sold

Measured from the repository, not from the brochure. This inventory is what justifies pricing above every DVR-only competitor in the Italian market.

17 DOCUMENT TYPES	8 RISK CALCULATORS	11 AI SERVICES	184 API ENDPOINTS	81k LINES OF CODE
--------------------------------	---------------------------------	--------------------------	-----------------------------	-----------------------------

Capability	Detail
Document generation	DVR Master (~187 pp) + 16 attachments and complementary documents — MMC, VDT, Stress, Gestanti, Incendio, Microclima (+severo), Biologico x3, PEE azienda/comune, HACCP manual + 16 forms, DUVRI, POS
Calculations	Risk Index I = 2D + P, NIOSH PLR/IR, VDT ≥20 h/week threshold, INAIL stress scoring (76 indicators), fire risk INF+SI+PI, PMV/PPD thermal comfort, PHS severe heat, MoVaRisCh chemical
AI layer	SDS PDF → structured chemical record (vision + structured outputs); site photo → equipment inventory; risk suggester across 11 categories; DPI matrix; improvement measures; HACCP CCP; POS phases; stress measures; company description
Data enrichment	VIES + Registro Imprese (openapi.com) + Serper + Firecrawl → company profile autofills from the P.IVA alone
Multi-tenancy	Organization → users + aziende, already isolated
White-label	Per-organisation logo, letterhead, P.IVA and RSPP name printed on every generated .docx — the platform is invisible to the end client
Live editing	In-browser .docx preview with inline editing and locked-paragraph rules (shipped 2026-07-20)

The pricing-critical fact

The white-label + multi-tenant layer already exists. A consultancy can put its own letterhead on the output today. That single capability is the entire basis of Model A — and it is what a perpetual desktop licence cannot deliver.

2 Cost base — why this is value-priced, not cost-priced

Variable cost of producing one complete engagement (typical PMI: 5 environments, 6 job roles, 25 risk rows, 8 chemical SDS, 15 photos, full 17-document set):

Component	Model	Cost
SDS PDF extraction ×8	gpt-5.5	€0,99
Equipment-from-photo ×5	gpt-5.5	€0,26
Improvement measures ×25	gpt-5.4-mini	€0,12
Risk suggerter ×5 (medium effort)	gpt-5.4-mini	€0,09
DPI matrix ×6	gpt-5.4-mini	€0,07
All remaining AI calls	mini / nano	€0,11
Visura camerale + search + scrape	openapi / serper / firecrawl	€0,21
Total variable COGS per engagement		€1,85
Heavy engagement (20 SDS, 12 environments, premium toggle)		€4,20

Infrastructure (Render, Frankfurt): €51/month for the current single stack; ≈ **€33 per organisation per year** at ~100 tenants, ≈ €20 at 300.

Implication

Gross margin sits at **92–97 %** at every price tested. Cost recovery is irrelevant to the decision. The only defensible anchors are **(a)** the buyer's own billable output and **(b)** what the market already pays for weaker tools. Both are documented on the next page.

3 Anchor A — what competing software costs

Product	What it is	Price, excl. VAT
DVR Suite — Starter	cloud, 1 DVR, 50 MB	€120/yr
DVR Suite — Basic	10 DVR, 500 MB, "for consultants"	€420/yr
DVR Suite — Pro	50 DVR, 1 GB, "professional firms"	€1.200/yr
DVR Suite — Unlimited	120 DVR, 5 GB	€2.400/yr
VRC Protection DVR-C	5 users, 15 DVR, 4 h support	€950
Easywork "DVR Generator" Safety Box	DIY single DVR, web app + printed manual	€350–380 one-off
Blumatica DVR Classico	perpetual desktop licence	€490
Blumatica Rischi Specifici	22 risk types — €60 per risk type	€1.320 list
Blumatica DUVRI / POS / PSC / Lavoratrici Madri	perpetual, per module	€125 / €155 / €155 / €69
Blumatica "Bundle RSPP"	DVR + madri + rischi specifici + MOG	€950

Blumatica figures are from an archived 2014 listino — nominal prices are stale, but the *relative module weighting* (a firm pays €60–155 *per risk type or per document type*) is the durable signal and the strongest justification for our document breadth. Sources: dvrsuite.it, vrcprotection.it, giornalepartiteiva.it, ordingrc.it.

Read-through. The market ceiling for a DVR-only cloud tool is ~€2.400/yr. Nobody in that table generates 17 document types; nobody applies AI to SDS extraction or photo-based equipment capture. We do not compete on that axis — but the €120–2.400 band sets the *floor of credibility*, not the ceiling of value.

4 Anchor B — what the buyer bills for the same output

Deliverable	Market fee to the end client
DVR — low risk, ≤5 workers	€100–250
DVR — up to 15 workers	€300–450
DVR — PMI	€600–1.500
DVR — high risk / complex organisation	€2.000–3.000+
DVR — documented cooperative listino 2023	€400 members / €425 non-members
Stress lavoro-correlato (SLC)	€175 / €200
VDT — ≤5 / 6–9 / 10–15 workstations	€350 / €400 / €450
RSPP esterno, <15 workers, annual mandate	€450–600/yr

Deliverable	Market fee to the end client
Manuale HACCP	from €200
Data certa — timestamp → notarised copy	€300–1.500

Sources: coopcommercialisti.it listino 2023, scuolasicurezza.it, gms-srl.it, sicurezza.com.

Read-through

A consultant's full N2O-style engagement (DVR + 5–8 attachments) invoices at **€1.500–4.000**. A studio serving 60 clients a year bills **€90k–240k** of document work. Software at €3.900/yr is **1,6–4,3 % of the revenue it produces**. That is the number for the sales deck.

5 Regulatory tailwinds worth pricing against

Driver	Commercial consequence
DVR mandatory for every employer with ≥1 worker (D.Lgs. 81/2008)	~1,5 M obligated entities. Not discretionary spend.
Art. 29 c.3 — update within 30 days of new equipment, an accident, or an organisational change	Recurring revision demand → justifies subscription over one-off licence
Art. 28 c.2 — data certa ; Cass. 14579/2026. Fine €1.228,50–2.457,02 without it	Sellable paid add-on with a quantified downside
Legge PMI 2026 (L. 11 marzo 2026 n. 34, in force 7 Apr 2026): simplified INAIL MOG templates; mandatory annual written smart-working risk notice, with sanctions ; VR training with digital traceability	Two <i>new recurring document types</i> land inside the existing engine. Build and price them before incumbents notice.

Addressable base: ~5,08 M active Italian firms; ~221 k with 10–249 employees; 94,6 % micro (<10). The micro tail is Model B; the 10–249 band is where Model A's buyers live.

6 The metering decision

COGS is €1,85 per engagement. Metering every AI call would create friction worth about two euros. **Bundle the cheap reasoning calls generously; meter only the three genuinely expensive or externally-billed actions.**

Action	Real cost	Credits	Margin on the credit
Improvement measure · risk suggestion · DPI matrix · POS phase · HACCP CCP · company description	€0,001–0,018	1	85–99 %
Equipment recognition from site photo (gpt-5.5 vision)	€0,052	2	79 %
SDS PDF extraction (gpt-5.5, structured)	€0,124	3	67 %
Visura camerale / Registro Imprese (billed by openapi.com)	€0,200	5	68 %

A complete engagement consumes **≈ 80 credits**. Plan inclusions are sized against that number. Overage packs:
500 = €79 · 2.000 = €249 · 10.000 = €990 (69–81 % gross margin on the pack itself).

7 Add-on catalogue

Add-on	Price	Why it prices this way
Onboarding & template migration	€1.500–4.000	The firm's own boilerplate, layout and risk library loaded into the engine. Real delivery work, and the strongest lock-in we have. Never discount to zero.
Custom document type	from €4.500	New generator built to their template (PSC, MOG, ISO 45001 manual)
Extra seat	€240/yr	Well above marginal cost; keeps expansion revenue honest
Extra active-company block (+25)	€600/yr	Scales with their book of business
AI credit packs	€79 / €249 / €990	See §6
Data certa — qualified timestamp + PEC deposit	€19/doc · €149/yr	Anchored against a €300–1.500 notarised alternative and the €1.228–2.457 fine
Google Drive / gestionale delivery integration	€900/yr	Already built for Drive — sell it
White-label domain + full brand removal	€1.200/yr	Consultant tiers only
Assisted review by a certified RSPP	€390–1.200	Pure services margin — and the legal-risk answer for the direct channel
Priority SLA + named CSM	15 % of ACV	Standard

8 Channel conflict — the one thing that can break this

Selling to consultants *and* to the companies those consultants serve is a real conflict. Resolve it structurally, before the first contract.

- **Segment by size and risk class.** Direct plans sell only to firms with <15 workers in low/medium risk classes. Everything above routes to a partner consultant — in writing, in the consultant contract.
- **Give consultants the override.** A partner-referred company converts into the consultant's tenant; the consultant keeps the relationship and earns a 20 % revenue share on that seat.
- **Never publish direct pricing that undercuts a partner's engagement fee** without saying why. €490/yr buys a template-driven document without professional judgement — a genuinely different product. State it explicitly in the marketing.
- **Legal exposure.** The *datore di lavoro* signs the DVR and carries liability. Position the direct product as "**DVR assistito**" with an optional RSPP review — never as "DVR fai-da-te".

9 Commercial hygiene

Currency & tax	EUR, all prices excl. IVA 22 %	3-year prepay	-15 %
Billing	Annual in advance; 12-month auto-renew, 60-day notice	Annual uplift	CPI + 3 %, capped at 8 %
Monthly option	+20 % (discourages it, funds churn risk)	Trial	30 days direct · 45-day 2-company pilot for consultants

No perpetual licences

HARD RULE

Blumatica has trained this market to expect them. Refuse. Content that tracks D.Lgs. 81/2008 amendments cannot be sold once — a perpetual sale creates an unfunded maintenance liability. The 3-year prepay at -15 % is the compromise.

Multi-client: the platform as billable capacity

Buyer: a firm like N2O SRL. Sells safety compliance to many client companies and needs to produce billable documents at scale, under its own brand.

	Solo	Studio RECOMMENDED	Network	Enterprise
Price per year	€1.490	€3.900	€8.900	from €18.000
Target	freelance RSPP	3–8 person studio (N2O today)	multi-office network	franchise / reseller
Seats	1	5	15	40
Active client companies	15	60	200	unlimited
Document types	all 17	all 17	all 17	all 17
AI credits / year	1.500	5.000	16.000	pooled
White-label letterhead	✓	✓	✓	✓
White-label domain	—	add-on	✓	✓
Template migration	add-on	1 set incl.	3 sets incl.	unlimited
Client sub-tenants	—	—	10	unlimited
API access	—	read-only	full	full + webhooks
Support	email, 3 days	email+chat, 1 day	named CSM, 4 h	SLA 99,5 %, 2 h
Onboarding, one-off	€0	€1.500	€3.500	quoted

"Active client company" = an azienda with at least one document generated or revised in the subscription year. Archived clients stay readable forever and do not count. It is the fairest available metric, and it is the one the buyer already thinks in — their client book.

Why these numbers

1 Priced as a share of the revenue it produces

Plan	Engagements	Studio's gross billings	Platform cost	% of billings
Solo	15	€22k–45k	€1.490	3,3–6,6 %
Studio	60	€90k–240k	€3.900 + €1.500	1,6–4,3 % after yr 1
Network	200	€300k–800k	€8.900 + €3.500	1,5–4,1 %

Every tier lands in the **2–6 % of produced revenue** band. Professional-tools spend is defensible up to ~10 %, so the objection will not be price — it will be switching cost, which the onboarding fee and template migration are

designed to convert into lock-in.

2 Priced against the labour it replaces

A manual full document set is 12–20 hours; a senior technician's fully-loaded cost is €35–55/hour. **Lead the sales conversation with this figure, not the feature list.**

3 Priced against what the market pays for less

Studio at €3.900 is roughly 3× DVR Suite Pro (€1.200, DVR only). The premium is carried by four things a side-by-side makes obvious:

- **17 document types vs 1.** Blumatica's own listino prices modules at €60–155 each; at their unit economics our attachment library alone lists above €1.300.
- **AI that removes data entry**, not just formats it — SDS PDF → structured chemical record, site photo → equipment inventory, risk library → suggested measures. No Italian competitor does this today.
- **The digital sopralluogo app.** The field technician captures once; office staff never re-key. This is the actual time saving.
- **White-label output.** The firm's logo, P.IVA and RSPP name on every document. A desktop licence cannot deliver this.

4 Why "active companies", not seats, is the primary meter

Seats scale with headcount; revenue scales with clients. A 3-person studio serving 80 companies is a bigger account than a 10-person studio serving 20. Metering on active companies aligns our revenue with theirs, makes expansion automatic, and removes the incentive to share passwords. Seats remain a secondary meter so a 40-person firm cannot buy Solo.

Unit economics

Plan	Price	Engagements	Variable COGS	Infra	Gross margin	Our cost / engagement
Solo	€1.490	15	€37	€33	95,3 %	€4,66
Studio	€3.900	60	€146	€33	95,4 %	€2,98
Network	€8.900	200	€487	€33	94,2 %	€2,60
Enterprise	€18.000	500	€1.219	€120	92,6 %	€2,68

Variable COGS = AI tokens (gpt-5.5 for SDS and vision, gpt-5.4-mini for reasoning, gpt-5.4-nano for boilerplate) + Registro Imprese / search / scrape calls, at a 25 % heavy-engagement mix.

Plan	ACV	CAC target	Payback	LTV (3 y, 90 % ret.)	LTV / CAC
Solo	€1.490	€900	7,2 mo	€4.023	4,5×
Studio	€3.900	€2.500	7,7 mo	€10.530	4,2×
Network	€8.900	€6.000	8,1 mo	€24.030	4,0×

All three clear 3× LTV/CAC and sub-12-month payback with room

This segment can absorb a real sales motion — inside sales, *ordini professionali* partnerships, trade events. The direct segment cannot. That asymmetry is the reason Model A launches first.

Add-ons that matter most here

Add-on	Price	Expected attach
Onboarding & template migration	€1.500–4.000	100 % on Studio+ (mandatory)
Extra 25 active companies	€600/yr	~40 % by year 2
Extra seat	€240/yr	~50 %
Data certa, unlimited	€149/yr	~50 %
White-label domain + brand removal	€1.200/yr	~30 % of Studio
AI credit pack (2.000)	€249	~25 %
Drive / gestionale integration	€900/yr	~20 %
Custom document type	from €4.500	~15 %, high strategic value

Modelled net revenue retention with these attach rates: **112–118 %**. The add-on layer, not the base plan, is what makes this segment compound.

Risks

Risk	Mitigation
N2O is both first customer and prospective competitor to other studios	Sell N2O a founding-partner position (Studio at €0 for 3 years, or a revenue share) in exchange for reference rights and template contribution. Fix it now; do not renegotiate annually.
"Active company" gaming via archive/unarchive churn	Count any azienda touched in the period; archived clients readable but frozen. Enforce in code before the first external sale.
Studios expect perpetual licences	Refuse. Lead with regulatory maintenance. Offer 3-year prepay at -15 % as the compromise.
Price objection anchored on DVR Suite's €1.200	Reframe on document count (17 vs 1) and hours saved (€33,6k). Never on feature parity.
No billing infrastructure exists in the codebase	Stripe subscriptions + Subscription/UsageCounter on Organization are prerequisites for any external sale. Estimate before committing to a launch date.

Recommended launch position

Lead with Studio at €3.900 + €1.500 onboarding. It is the tier N2O itself occupies, so it ships with a real reference story; it prices at 2-4 % of the buyer's billings; and it clears CAC in under eight months. Solo exists to make Studio look reasonable and to catch freelancers. Network exists to give Studio somewhere to grow into.

Single company: the compliance file that stays current

Buyer: a *datore di lavoro* who must hold a DVR for their own company and does not want to pay a consultant to retype it every time something changes.

Positioning first, price second

This tier is **not** "DVR fai-da-te". The *datore di lavoro* signs the DVR and carries the liability — a tool that hands them an unreviewed document and walks away is selling them exposure, and it will eventually cost N2O its reputation at an inspection. Sell it as "**DVR assistito**": the platform does the structure, the calculations and the writing; a certified RSPP reviews and countersigns on request. That framing is what lets us charge above the €350 DIY box products and below the consultant — in the gap nobody currently occupies.

	Base	Plus RECOMMENDED	Multi-sede
Price per year	€490	€990	€2.400
First year, incl. guided setup	€690	€1.290	€2.900
Target	micro firm, ≤15 workers low / medium risk	PMI, 15–50 workers	10–249 workers multiple sites
Sites (sedi / unità locali)	1	3	10
Users	2	5	15
Documents	DVR Master + MMC, VDT, Stress, Gestanti, Incendio	+ Microclima, Biologico, PEE, DUVRI, chimico (MoVaRisCh)	all 17 — incl. HACCP manual + 16 forms, POS
AI credits / year	150	400	1.200
Digital sopralluogo app	✓	✓	✓
Unlimited revisions & re-generation	✓	✓	✓
Art. 29 c.3 revision reminders	✓	✓	✓
Data certa	add-on €149/yr	included	included
RSPP assisted review	add-on	1 / year incl.	2 / year incl.
Support	email, 3 days	email + chat, 1 day	phone + named contact

30-day free trial, full features, no card. Guided setup is a 60–90 minute remote session — it is what converts trial to paid in this segment and it should never be self-service.

Why these numbers

1 Anchored on the invoice they already pay

A PMI buying a DVR + stress + VDT + data certa pays **€1.175–2.100** in year one — and pays again on every revision.

Plan	Price	Replaces	Read-through
Base	€490	a single low-complexity DVR (€300–450)	Sits just above one document — but includes four attachments and unlimited revisions. Over 3 years: €1.470 against €900–1.350 of consultant fees for the <i>same three documents once each</i> .
Plus	€990	€1.200–2.100 of first-year consultant work	Pays for itself in year one and undercuts on every renewal.
Multi-sede	€2.400	€3.000–8.000 of multi-site consultant work	Deliberately the last tier — see §4.

2 Anchored against the DIY products already in market

Product	Price
Easywork "DVR Generator" Safety Box one DVR, DIY web app + printed manual	€350–380 one-off
DVR Suite Starter 1 DVR/yr, cloud, 50 MB	€120/yr
N2O Base 5 documents, calculations, AI, assisted review	€490/yr

Base is 29 % above the Safety Box and 4× DVR Suite Starter. That premium has to be earned in the first screen of the marketing site:

- 5 documents in Base, not 1 — 17 in Multi-sede
- Real calculations, not templates: NIOSH lifting index, VDT exposure threshold, INAIL stress scoring, fire risk INF+SI+PI, PMV/PPD
- Autofill from the P.IVA alone — the company profile builds itself
- SDS PDF → structured chemical record; site photo → equipment inventory
- **Unlimited revisions**, which is the actual recurring obligation
- An RSPP who will put their name on it

3 Subscription, not one-off — and the law says so

This is the argument that makes annual billing legitimate rather than extractive:

ART. 29 C.3

30 giorni

to update the DVR after new equipment, an accident, or an organisational change. A one-off document is stale the first time they buy a machine.

ART. 28 C.2 — DATA CERTA

€1.228–2.457

fine for a DVR without a certain date (Cass. 14579/2026). Every revision needs a fresh timestamp — an annually recurring act.

LEGGE PMI 2026

ogni anno

A written annual smart-working risk notice is now mandatory and sanctioned — a document that must be reissued every year, for every company with remote workers.

The recurring value is *"your compliance file stays current and defensible"*, not *"we sold you a Word file"*. Price the subscription on that sentence.

4 Where the price ceiling is

Above ~€2.400/yr the buyer stops comparing us to software and starts comparing us to a full RSPP mandate with a human on site. That is a fight we should not pick — it is the consultant channel's business, and taking it triggers exactly the conflict described in **Foundations §8. Multi-sede at €2.400 is deliberately the last tier.** Anything larger routes to a partner studio.

Unit economics

Plan	Price	Engagements / yr	Variable COGS	Infra	Gross margin
Base	€490	2 (initial + 1 revision)	€4	€25	94,0 %
Plus	€990	4	€10	€25	96,5 %
Multi-sede	€2.400	12	€31	€40	97,1 %

Plan	ACV	CAC target	Payback	LTV (3 y, 90 % ret.)	LTV / CAC
Base	€490	€180	4,4 mo	€1.323	7,3×
Plus	€990	€320	3,9 mo	€2.673	8,4×

The CAC target is the whole game

€180–320 only works through self-service acquisition: SEO on *"quanto costa il DVR"*, commercialisti and consulenti del lavoro as a referral channel, associazioni di categoria (Confartigianato, CNA, Confcommercio) bundles, marketplace listings. **A field sales motion cannot be funded at €490 ACV.** If go-to-market ends up requiring calls, this tier must be dropped or repriced upward.

Add-ons

Add-on	Price	Note
Extra site (sede / unità locale)	€180/yr	Main expansion path for growing firms — ~25 % attach
RSPP assisted review + countersignature	€390 / doc set	The liability answer; pure services margin for N2O — ~35 % attach in year one
Data certa, unlimited	€149/yr	Included from Plus up — ~60 % attach on Base
Additional document type on Base (POS, HACCP, DUVRI)	€190/yr each	Upsell ramp into Plus
AI credit pack (500)	€79	Rarely needed at this volume; exists to avoid hard stops
On-site sopralluogo	quoted	Protects N2O's existing service revenue
Formazione / corsi bundle	partner-priced	Every DVR customer also has training obligations

Modelled net revenue retention **106–110 %** — lower than the consultant tier, as expected for SMB.

Segmentation guardrail **NON-NEGOTIABLE**

Direct plans sell **only** to companies with <15 workers in low/medium risk classes (Base) or <50 workers (Plus). Anything above, anything in a high-risk ATECO class, and anything involving construction sites (POS/PSC) routes to a partner consultant, who keeps the client and earns a 20 % share on the seat. Without this rule enforced **in the signup flow, not just the contract**, the two models attack each other — and the consultant channel, with 4× the ACV and a fundable sales motion, is the one that dies.

Risks

Risk	Mitigation
Legal exposure if a self-served DVR is judged inadequate	Never market as "fai-da-te". Assisted review prominent. Terms of service state that the DdL is the responsible party and the platform is a drafting aid. Get this reviewed by counsel before launch.
CAC exceeds €320 and the tier goes underwater	Gate launch on a measured CAC from one paid-channel test. Do not scale on assumption.
Support load per euro far exceeds the consultant tier	Self-service onboarding content, in-app guida (already built), 3-day SLA on Base. Watch cost-to-serve monthly; above 15 % of ACV, raise Base to €690.
Buyer expects a one-off purchase and resents renewal	Lead every marketing asset with art. 29 c.3 and the data-certa fine. The recurrence is legal, not commercial.
No billing, quota enforcement, or self-service signup in the codebase	Same prerequisite as Model A, plus dunning and plan-gating in the UI.

Recommended launch position

Do not launch this tier first. Consultant plans have 4–8× the ACV, a fundable sales motion, and N2O as a live reference. Build and prove Model A, then launch **Plus at €990** as the single headline direct plan — Base and Multi-sede as flanking anchors — through referral partners rather than paid acquisition, with the segmentation guardrail live from day one.
